SUMMARY:

Around 2 years of experience in full stack web and mobile app development with expertise in front-end and back-end development, collaborative team player with a passion for staying updated on emerging technologies.

TECHNICAL SKILLS:

- **Frontend** – React Js, Vue.js, Next.js, JavaScript
- **Backend** – Node.js, Express.js, PHP
- **Mobile** – Android, Flutter
- **Database** – MySQL, MongoDB, DynamoDB, Firebase Firestore & Realtime DB
- **Known Platforms** – Firebase, Google Cloud & Maps Platform, AWS

EXPERIENCE:

Software Engineer – Ridipt Technologies | June 2023 – Present

- Engineered a robust API in Express and Node.js, enabling seamless data retrieval from MongoDB and MySQL database server, leading to a 25% reduction in front end loading time and improvised user experience.
- Engineered server less architecture using AWS DynamoDB, Lambda, API Gateway.
- Engineered AWS IOT Core for sending charger data into DynamoDB using serverless architecture.
- Designed attractive and responsive web pages using CSS3, Tailwind CSS, Bootstrap, MUI and Chakra UI library.
- Integrated Razorpay payment gateway in react web and flutter app.
- Engineered modules like digital wallet system, resume builder, customised calendar, slot booking system.
- Integrated various services from platforms like Firebase, Google Maps Platform etc.
- Provided comprehensive training to trainees, empowering them to make independent updates.

Associate Software Developer– Progneur Technologies | Sep 2022 – May 2023

- Fixed existing bugs in app and increased overall speed, user experience & performance which led to improved customer satisfaction and retention rates.
- Resolved issue related to ads views and generated report for analytical data in. Csv format.
- Engineered a robust API in Express and Node.js, enabling seamless data retrieval from MongoDB and MySQL database server
- Extended admin and client app with features like reward system, request feedback, personal chat, textual news etc.
- Integrated Crashlytics, Analytics etc for user engagement and runtime errors.
- Configuration of Mobile Device Manager Plus (MDM) with Android tablets to control application and permission of Android.

PROJECTS:

FoodFlights Private Limited (Cloud kitchen based Self-Startup**) |** June 2021 – June 2022

Tech Stack: Android, Java, PHP, MySQL

- Crossed 5000+ installs on google play store. 50+ daily food orders. 100+ daily active users. Operated in 2+ cities. Generated 20k+ profit monthly.
- Android UI design in XML.
- Connect android application to backend services.
- Worked on SQLite Database.
- Integrated Firebase, Google Maps Platform & Razorpay Payment Gateway

EDUCATION:

DY Patil International University, Pune | BTech in Computer Science and Engineering | July 2019 – June 2023
